

SHAHEEN C

Data Analyst

Doha, Qatar · +974 71842616 · shaheenshanu246@gmail.com · [LinkedIn](#) · [GitHub](#)

PROFESSIONAL SUMMARY

Junior Data Analyst with hands-on industry experience at Happe Toys, Doha, where I build and maintain Power BI dashboards used in live management reporting. Certified in Microsoft Power BI (UniAthena). Skilled in SQL, Python, DAX, and Excel-based data transformation. Complemented by a portfolio of four independently built and deployed applications — including an ML-based churn prediction system, a student analytics platform, and a data cleaning automation tool. BSc in Computer Science, University of Calicut (2025).

TECHNICAL SKILLS

BI & Analytics	Power BI (DAX, Power Query, Excel/CSV integration), Tableau, Excel (PivotTables, Power Query, VLOOKUP)
Programming	Python (Pandas, NumPy, Scikit-learn), SQL, JavaScript, HTML/CSS
Data Skills	Data Cleaning, Data Modeling, Exploratory Data Analysis, KPI Reporting
ML & Statistics	Classification Models, Feature Engineering, Model Evaluation (Scikit-learn)
Tools	Flask, MySQL, Supabase, REST APIs, Git, Figma, Jupyter Notebook
Certification	Analysing and Visualising Data with Microsoft Power BI — UniAthena

PROFESSIONAL EXPERIENCE

Data Analyst | [Happe Toys](#) | Doha, Qatar

January 2026 – Present

- Built and maintain 4 Power BI dashboards connected to Excel/CSV sources, tracking sales revenue, product performance, and growth trends — actively used in management reporting
- Developed KPI reports covering sales targets, profitability, and category-level performance, presented in regular management review meetings
- Perform data cleaning and transformation in Power Query to ensure accurate, consistent reporting across datasets
- Translate business requirements from non-technical stakeholders into clear visual analytics in Power BI
- Support inventory and sales decisions by identifying trends and anomalies in product and revenue data

Data Analyst Trainee | [Haris & Co Academy](#) | Calicut, India (In-Person)

May 2025 – December 2025

- Completed a structured 7-month, in-person data analytics programme covering Python, SQL, Excel, Tableau, and Power BI
- Performed data cleaning and exploratory data analysis on structured datasets as part of project-based assessments
- Built interactive dashboards and KPI reports to practise real-world analytics workflows

Web Designer Intern | [HeadCodes](#) | Kochi, India

August 2023 – November 2023

- Designed responsive web interfaces as part of internal practice projects, focusing on layout, usability, and cross-device compatibility
- Gained hands-on experience with the full design lifecycle — from wireframing concepts to producing final design deliverables

KEY PROJECTS

Student Performance Analytics System — *Python · SQL · Power BI · Flask · MySQL* · June 2025 · **Deployed**

- Built a full-stack analytics platform with module-wise marks, attendance tracking, and batch management stored in MySQL
- Connected Power BI to MySQL with scheduled refresh; applied DAX measures for rankings and performance trend analysis
- Developed a Flask REST API with full CRUD functionality and a custom frontend — deployed and ready for real users

Customer Churn Prediction System — *Python · Scikit-learn · SQL · Power BI* · August 2025 · **Portfolio Project**

- Built an end-to-end ML pipeline on a practice dataset, achieving 85%+ accuracy using classification models
- Applied feature engineering, data preprocessing, and model evaluation (precision, recall, F1-score) to assess performance
- Visualised churn risk segments in a Power BI dashboard to demonstrate how results could support marketing decisions

Cleanlytics – Automated Data Cleaning Tool — *Python · Pandas · API Integration* · June 2025 · **Live — In Personal Use**

- Built and actively use a Python automation tool that reduces my own data cleaning time by 70% through smart null-handling and transformation pipelines
- Integrated external APIs for data enrichment and implemented auto-generation of KPI summaries from cleaned datasets

Parkiko – Parking Marketplace Platform — *Full-Stack · Maps API* · June 2025 · **Deployed — No Live Users Yet**

- Built a full-stack marketplace for real-time parking availability, including booking flows, user authentication, and property management
- Designed the database schema and integrated Maps API for location-based search — deployed but not yet launched to public users

EDUCATION

Bachelor of Science — Computer Science | **University of Calicut** | Kerala, India
2022 – 2025
